PO Box 991653 Redding California 96099 408-757-0101

Ordering: A \$20 minimum order is required. Fabric valued over \$50 will require a signature on delivery. Place your order online first, specifying as much detail as possible.

Fabric: Our dies produce the best buttons with 7-10 oz/yd² woven fabric. Heavier or lighter fabrics will require testing before production. Ship enough fabric for your order plus at least five test buttons. Please clearly mark the wrong side of the fabric with an X.

Special Placement: If you need special placement of the buttons on your fabric, DO NOT use the Fabric Calculator! Instead follow the instructions on the Special Placement page and ship enough fabric to place the number of buttons for your order.

Lining: Lightweight and loosely woven fabrics require a lining to keep the metal of the button shell from shining through. Other fabrics such as thin knits, can be made with a thicker lining (such as a stretch polar fleece) to add "padding" to the button. You can ship your fabric already lined or have us line the fabric with lightweight fusible for an extra charge. To line the fabric, tack fusible lightweight interfacing to the wrong side. If you are not sure, you can ship your fabric with unattached fusible interfacing and we can determine if the interfacing is necessary. Please contact us before ordering if you would like to use fleece or other types of lining as this will require an additional cutting charge.

Please read the terms below, agree to the terms with your signature and ship this page with your fabric to:

PO Box 991653
Redding, CA 96099

Terms: Please understand that to produce covered buttons, the fabric is cut into many small circles. Once production begins, your fabric cannot be recovered. We will test your fabric for suitability before cutting the entire order. After testing your fabric, if we feel that the order needs revision, we will either refund you for services that are not necessary or contact you to approve of any additional charges. Home Folklore reserves the right to refuse completing a button order if, after performing at least five tests, we feel that the fabric will not produce perfect buttons on our equipment (some fabrics do not). Please contact us in advance if you have heavy, light or novelty fabric. We may request that you send a sample of fabric before placing your order. If you cancel the order before production begins, your fabric will be returned on request only. You are responsible for return shipping charges.

1. Make a copy of your fabric either on a copier or a scanner. Either by hand or on the computer, draw circles the size of the button cut size (see the Fabric Calculator page) in the places on the fabric where you would like your buttons *centered*. Remember that the actual button shell size (dotted line above) is half the size of the circle so the material around the edge will not be visible on the finished button.

2. Include a copy of your drawing with your fabric and signed page one of this document. Please include this page with your fabric if you have included special instructions, repeat information etc. below.

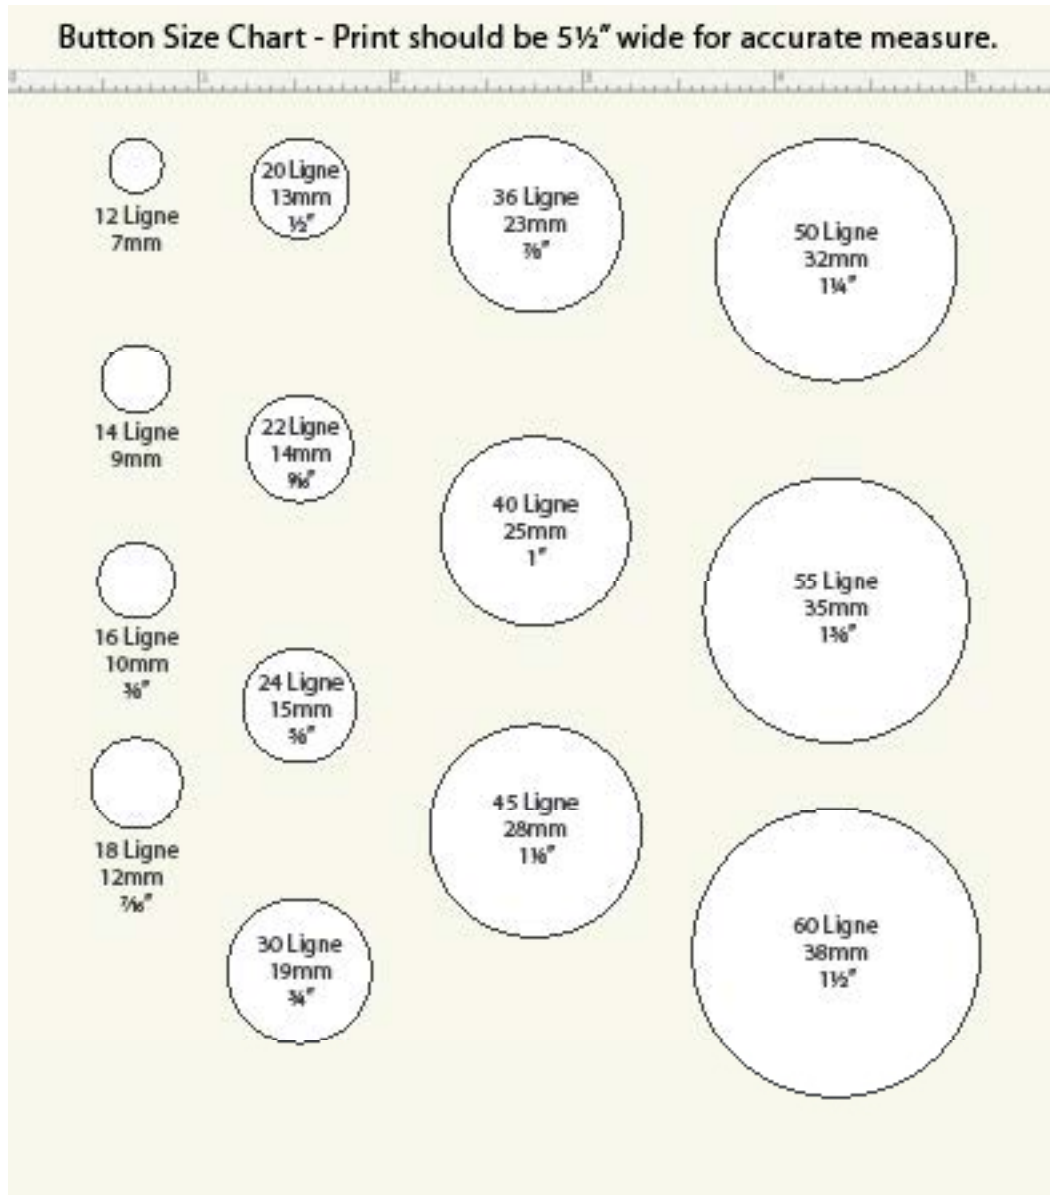

NOTE: The fabric is cut by eye. Also, depending on the fabric type and if it is unlined, there can be some stretching/distortion of the fabric during the button-making process. Please do not expect pinpoint accuracy!
